GSA Workshop – Galileo best practice

The Galileo inclusion in RTK networks

GENERAL ASSEMBLY OF CLGE

Alina Hriscu, GSA

Lausanne/ Switzerland, 21-22 April 2017

Galileo best practice – the Galileo inclusion in RTK networks

Very much anticipated Galileo's Initial Services accelerated adoption – over 50 percent of receivers in the market are Galileo enabled

To get desirable (real-time) accuracy the GNSS signal has to be augmented

RTK, PPP, etc.

GALILEO adoption within RTK networks is a crucial factor for Galileo adoption in High Precision sector

Galileo best practice – the Galileo inclusion in RTK networks

First hands-on experience :

SWEPOS – Eriksson Mattias

GeoSoft – Hugo Toll
