

Professional association **geosuisse**

- > Discussions about role of surveyors!
- > Intention to join the sia (Swiss Association of Engineers and Architects) as an independent but integrated professional group!

- > Expected:
 - more political influence!
 - Better understanding of the role of the surveyors by the
 - colleagues in the fields of construction and planning!
 - better support in questions of education in engineering!

Reflections on the licensing question

New draft ordinance:

- > state exam instead of licence
- > official surveyor register
- > new requirements in education: more legal, land management, business and project management
- > looking for offers from different schools and programmes

Federal Law on Geoinformation

-> Law was accepted by the federal council and passed to the Parliament!

-> **Contents:**

1. **General Rules**

2. **Principles**

Quality and technical requirements

Data capture maintenance and management

Access and utilization

Cadastral on restrictions by public law

Services of the confederation

Duties to support and to tolerate

3. **National Survey**

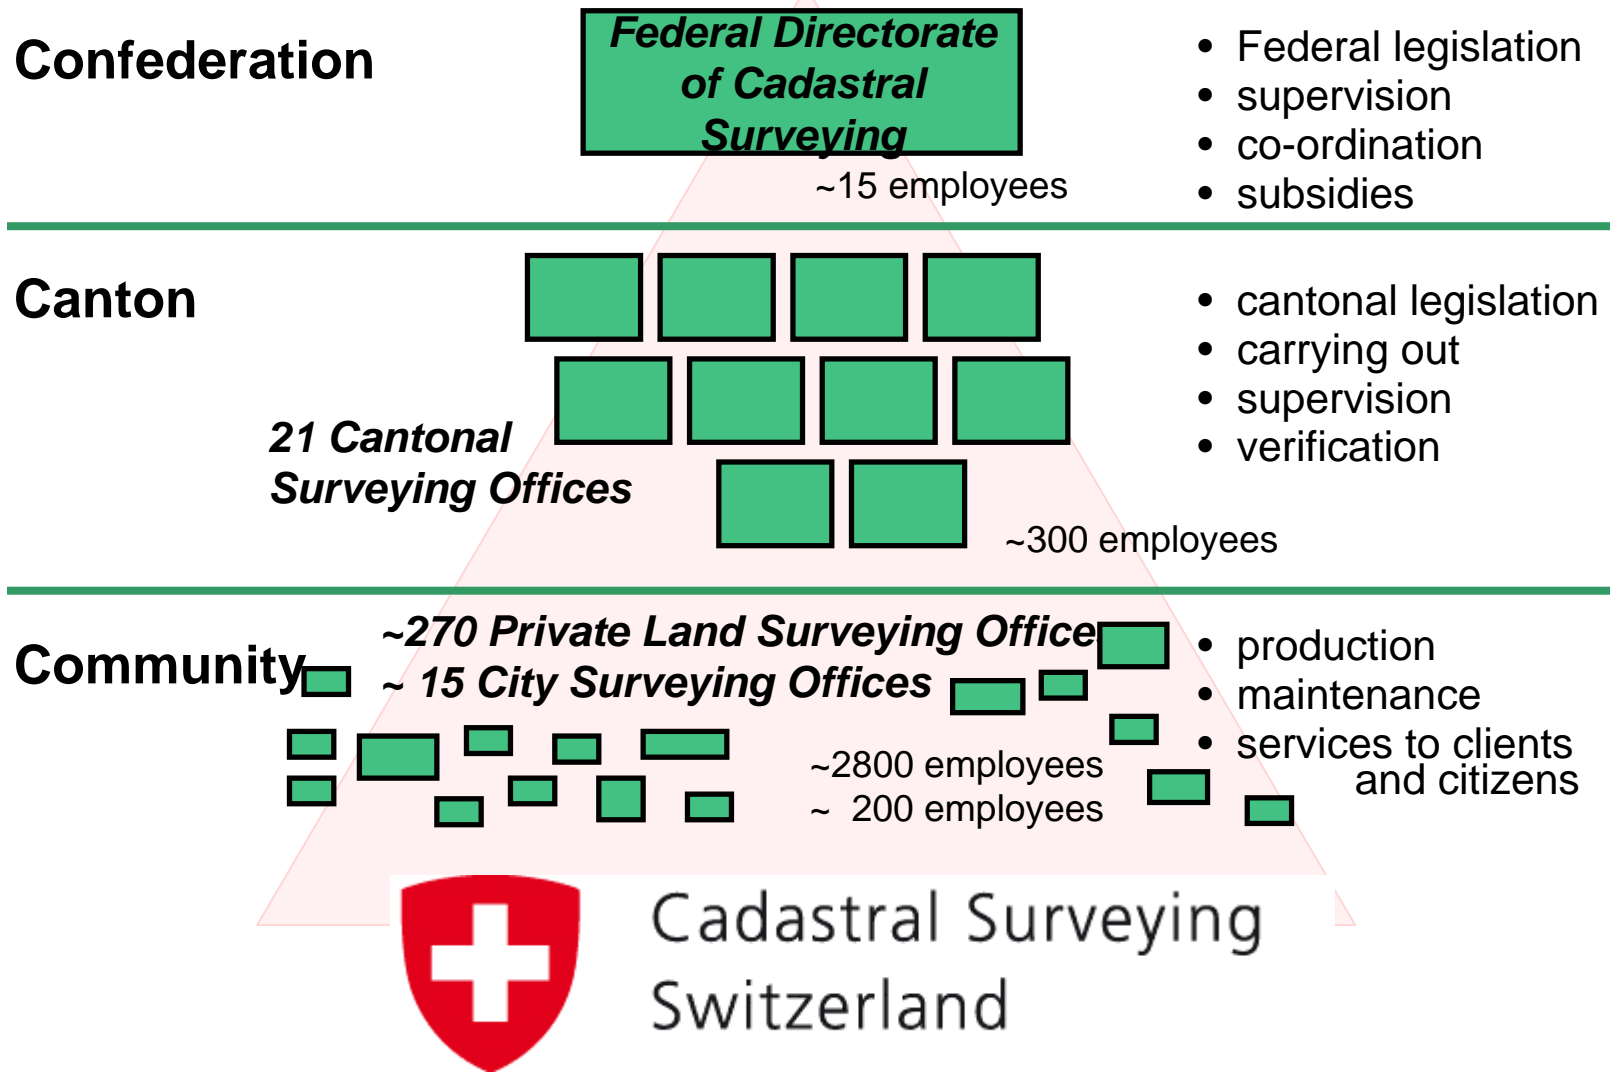

4. **National Geology**

5. **Cadastral Survey**

6. **Organization**

7. **Final arrangements**

Corporate identity of the Swiss cadastre organization

National Geo Data Infrastructure (NGDI) Lessons learned

- > efforts to bring all interested stakeholders together going on!
- > still no consolidated common view
- > NGDI is not fully understood view;
- > Idea of the road network, where we have federal, cantonal, municipal and private roads, open for use by all interested partners!
- > Progress is positive but still very slow!
