

## 3D Cadastre – Technical and Legal Aspects

As a follow up of the presentation given in Hanover by Stephan Heitmann with the title [Towards a 3D Cadastre - The approach in North Rhine-Westphalia](#) we will now go into more detail about this topic.

We invite Stephan again to give us a short reminder and update about his paper presented in Hanover.

Moreover Mrs. Helena Åström from Switzerland (swisstopo) will give an additional presentation about the legal aspects of 3D Cadaster.

On Saturday morning we will have a one hour discussion about the Challenges of 3D Cadaster and possible opportunities for CLGE in presence of both experts.

Vice President Pedro Ortiz will moderate this session.

### **Interesting readings to prepare yourself:**
