

Workshop on Land Re-allotment and Land Consolidation

In this workshop we prepare for the Seminar in Moldova that will take place on the 3rd of October 2013 in Chisinau (just before the next CLGE GA in the same place).

This CLGE Seminar will focus on how to implement an efficient and modern cadaster in a country.

Land Re-allotment and Land consolidation procedures are essential in this field and will be discussed during the workshop in Budapest.

Our French colleagues from OGE will organize a very specialized workshop in the same field in Lyon in September and a rapporteur will join us in Moldova too. CLGE delegates are also invited to take part in this seminar in Lyon.

In Budapest, Maurice Barbieri will introduce the topic with a presentation. Other speakers will join him.

On Saturday morning, he will moderate a round table to prepare the Moldova Seminar about best practices in this sector.

Interesting readings to prepare yourself:
