-

CLGE Seminar on Land Re-allotment and Land Consolidation

Conclusions of the Budapest Workshop:

- Given the importance and position of CLGE, the need for a proactive CLGE policy was emphasised in defining the true goals of land consolidation.
- The position of geodesy needs to be clearly defined, and the role and obligations of land surveyors in land consolidation procedures.
- The need to exchange and transfer knowledge and information among countries was highlighted, and the need to share recommendations and apply harmonised procedures and EU directives apply harmonised procedures and EU directives.
