

Current development of Utility and Underground Cadastre in Kosovo

**Mr. ing. Qemajl Kadiri, geod.
Reshat Murati, GIS expert**

**Utility Cadastre Seminar
Organized by:
Council of European Geodetic Surveyors &
State geodetic Administration of the Republic of Croatia**

Zagreb, Gruška 20, November 26. 2015

Kosovo Basic Information

■ AREA	10 908 km²
■ BORDER LINE	744 km
■ CADAS. ZONES	1305
■ MUNICIPALITIES	38
■ CADAS PARCELS	2 Mill.
■ OWNERS	495 000

Kosovo Cadastre Land Information System

- Kosovo Cadastral Agency is the owner of the Kosovo Cadastre Land Information System (KCLIS)**
- Municipal Cadastral Offices are responsible for daily maintenance of Cadastre**

Basic cadastre units in KCLIS

1.cadastral parcels;

2.buildings;

3.parts of the buildings, and

4.utilities.

Utilities in KCLIS

- Utilities are cadastral units defined by the law on cadaster,
- Utilities as cadastral units are included in official registers: KCLIS – Text and Map
- Surveying and the registration of the utilities in the cadaster will be done in detail according to the Administrative Instruction based on the Law on Cadaster

Current situation of Utility data

- So far we have not registered any kind of utilities in the cadastral official register.
- For the moment only the municipality of Pristina has had a project to record the utilities, but the same one has not entered into the KCLIS
- The utility data which are digitized by utility owners are delivered to KCA and published in National Geoportal

Further plans

- ASAP finalize the Project: Study for Creation of Utilities Cadaster and Underground Facilities
- Draft and approve the administrative instructions for utility cadaster
- Implement INSPIRE directive for creation and maintenance of utility
- Run the projects for massive registration of utility data in official register KCLIS
