- 3 workshops
- 20 countries (European and non European)
- two special sessions within FIG WW
- FIG Young Surveyors Network Charity Run/Walk

# FIG EYS & CLGE Workshop: Dynamic Professional Knowledge Database for surveying profession

## Delivering the Digital Dream

CLGE Dynamic Professional Knowledge Base (DPKB)  
Diana Becirevic, Croatia

### Purpose/aim of Workshop:

The Development of the CLGE DPKB and Involvement of YS in CLGE Projects.

It had become obvious during the past years that there is a considerable lack of information when it comes to national rules, regulations and practices of geodetic surveying throughout Europe. At the same time there was a rising demand for such concise information.

CLGE decided to take the initiative and drafted a concept for a so called "Dynamic Professional Knowledge Database". The CLGE database will be in English and is meant to be a regularly updated comprehensive collection of all relevant information about the profession of Geodetic Surveyors in all CLGE Member countries.

A very important aspect of the database is to provide an information pool and guidance for individual Geodetic Surveyors who are interested in providing their services in other countries mobility within the profession.

...an  
information pool  
and guidance for  
individual  
Geodetic  
Surveyors...

## Also .....
