

GeoBusiness Netherlands was launched on November 22, 2007

Under the watching eyes of 60 Dutch interested persons a new branche organization in the field of geo-informatics was born during the Dutch GIN Congress in Amsterdam on November 22, 2007, by a fusion of the VNBG and the BGI.

The new born "baby", called Geo-Business Nederland, has not only the responsibility to promote and serve the interests of the member geo-informatic companies, but has the intention to raise the Dutch geo-informatic sector to a higher platform into the Dutch and European geo-informatic performance. Our appreciated colleague Wim van Pijkeren, commercial Manager at Arcadis Nederland b.v., and Dutch delegate in the CLGE, is also Executive Board Member in the Geo-Business Nederland.
