## 5. Report President and Ex-Board

CLGE is participating to the 2023 [FIG - International Federation of Surveyors](#) working week in Orlando, Florida, USA.

Today, some of us gave some presentations about our projects such as [#GISCAD-ov](#), [#Condominium](#) project or [#Bluesurveying](#) Sevilla Declaration in cooperation with our Spanish colleagues of [COIGT Andalucía](#).

During this worldwide event, we have the opportunity to exchange with colleagues on a multitude of topics such as technical and legal good practices but also about environmental and sustainable subjects (water, soil, agriculture, climatisation changes, reduction of the production of CO2 etc.). We can confirm that we have to involve [FIG Young Surveyors](#) who are the future of the profession. They are the clue to find the best solutions to modify the way to manage projects, our companies and practices to give them and the next generations a better world.

For the first time, [#IGSM](#) is placed under the patronage of [CLGE](#). Our new delegate for Young Surveyors Marineli Dancheva represents us at this event

We think it is important for you to know about this competition. We encourage you to participate, there are very juicy prizes!

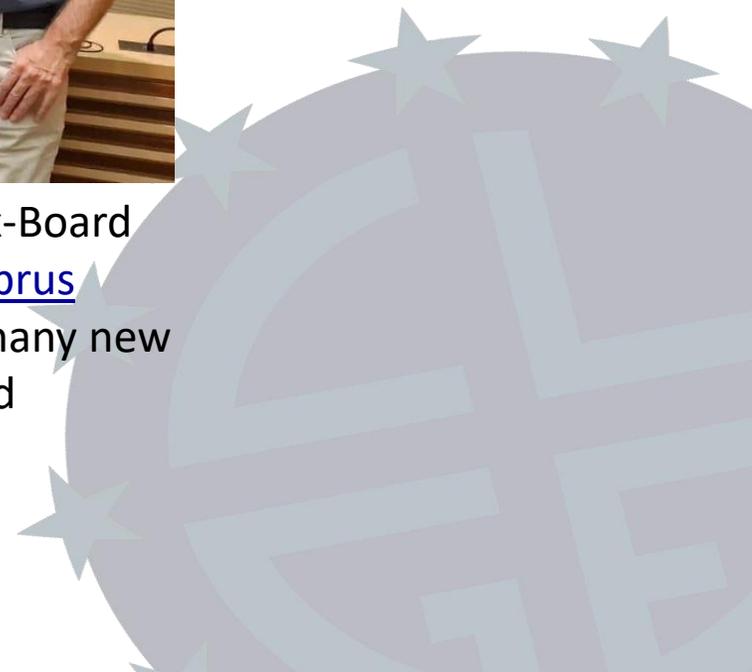

Meeting of the CLGE Bureau to prepare the activity of the next year of our association, the next GA in Paris and the next one, in Cavtat in Croatia. And it is always interesting to understand the functioning of an Surveying Chamber in our member countries.

The Landsurveying sector in Cyprus is booming. The [CLGE](#) Ex-Board had fruitful discussions with its Chypriot members at the [Cyprus University of Technology](#) in Limassol, and went home with many new ideas and best practices. The Cyprus Association of Rural and Surveying Engineers is more than ready to join our Code of Professional Qualifications for Property Surveyors

CLGE supports the Romanian  
Surveyors' Union (UGR) in shaping  
our profession

We are having our IG-PARLS meeting in Berlin just before the [CLGE](#) Students' Contest Awarding Ceremony in [INTERGEO - Geodesy, Geoinformation and Land Management](#) 2023 !

Here are the photos of the highlights of the CLGE Students Contest Awarding Ceremony at [INTERGEO - Geodesy, Geoinformation and Land Management](#) Berlin 2022

CLGE is well represented at the PCC meeting in Madrid. [Nele Vanhoutte](#) has presented our Council to the European Cadastral Agencies, including the Institutional CLGE membership designed for them.

Meeting of the Permanent Committee on Cadastre in the EU (PCC)

Organized by the Geodetic Society of Herceg-Bosna in Neum from September 27 to 29, 2023. the 5th Congress on Cadastre in BiH was held with international participation, and under the high patronage of the President of the Federation of BiH Lidija Bradara. The motto under which the Congress is organized is "Land administration is the basis for economic development".

As the President of CLGE, I gave a welcome speech, and Matjaž and I had very fruitful discussions with our colleagues from Southeast Europe. It seems that in the spring, CLGE could get some more full-fledged members from this region.

Thanks to Trimble Inc. and National Society of Professional Surveyors (NSPS) for the kind invitation. Amazing interest from the American audience. CLGE smart regulation is a sound approach. We can learn from NCEES with their fundamental and practical examinations
